**Achieve up to 20–30% extra productivity
by using the right abrasive**

- ★JX Abrasive focus in supplying top quality steel shot and steel grit to our customers .
- ★Using top quality steel abrasives you can increase your production substantially .
- ★Simply using quality abrasives will give you a good quality clean surface in less time .

Top quality long lifetime low cost good effect

JX 鋼丸 好產品，壽命長，低成本，效果好！

Available size : S70 S110 S170 S230 S330 S390
S460 S550 S660 S780 S930

According the customers' demand , JX Abrasives supply rail steel grit and bearing steel grit to achieve different results.

Rail steel grit

High Manganese Contain

Bearing steel grit

High Chromium contain

Advantange : good durability , well resistance

JX鋼砂硬度適中、韌性强、抗衝擊，具有壽命長，反彈性好，附着力強，清理速度快耗砂低，不破碎，清理工件亮度大，技術效果好的特點。

Available size :G10 G12 G14 G16 G18 G25 G40
G50 G80 G120

JX cut wire shot is produced by cutting high quality wire into the form of cylinders with lengths approximately equal to the wire diameter. It's available in cylinder and conditioned shape.

JX 切丸 不銹鋼丸 鋼絲切丸 鋅丸 鋁丸 銅丸

Stainless steel shot

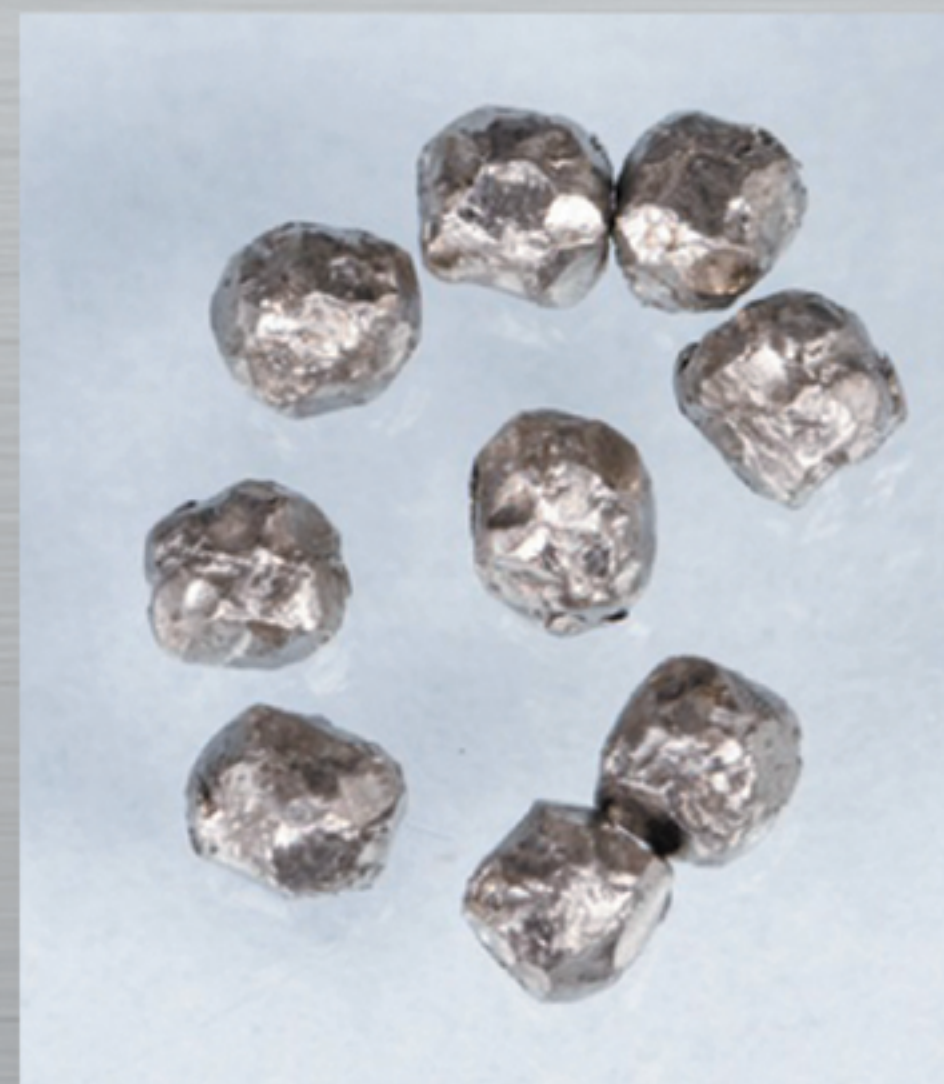

conditioned cut wire shot

Copper shot

Aluminium shot

QuanZhou Blasting Machinery

Supply a better solution for surface treatment....

Our mission: Providing the good quality products & service efficiently, to give our customer's value for money with an excellent response time.

Manufactured to meet your needs. Systems include:

-
- Structural Steel
 - Plate Steel
 - Foundry
 - Overhead Conveyor
 - Plate Preservation Lines
 - Table Blast
 - Roller Conveyor
 - Bar & Wire/Coil Steel
 - Tumble Blast
 - Work Car
 - Wind Tower
 - Spinner Hanger
 - Steel Drum & Lid
 - Rail Car
-

Put our experience and expertise in the shot blast industry to work for you!

Roller conveyor systems

Fully automated system designed to descale and remove rust from plate and structure members prior to fabrication.

Blast and paint lines

Prior to profile cutting, steel plates and profiles are completely blasted before a weldable zinc based primer coating is applied.

QuanZhou Blasting Machinery

Supply a better solution for surface treatment....

Spinner hanger systems

Designed to blast clean workpieces on an overhead conveyor, achieves maximum exposure of the parts to the blast streams.

Tumblast systems

used in small and medium size castings and forgings, stampings, gears and springs of surface cleaning, shot peening, tumbling and vibratory finishing.

Portable sand blaster

Used to clean bigger components on-site, like steel structure, bridge, big tank body, used for big tanks vessel repair, pipe rust removing at oil field, container renew, generally use in open or blast room.
